Webpages and Their Purpose

Index Page

- This page serves as a home page for the website, it gives the audience a brief introduction to me and my character.

Professional Page

- This page introduces the audience to my professional life. This includes my intended career path, the various requirements it needs and how I intend to achieve them/

Personality Page

- This page is intended to showcase how I am as a person, the emotions and traits I exhibit the most. The audience also gains insight into my personality when they find out my hero.

Personal Development Page

- This page depicts my intentions to develop towards the successes I want to be in my life. The audience also gains an insight into why I decided to make these decisions.

Storyboard Page

- This page is used to give a full overview/ outline of the webpages that are within the website of my portfolio.

Reference Page

- Cites all external resources utilized in the completion of the website

Theme of the Site

The atmosphere that is the website's aim is one of prestige and dignity. Which is why the main three (3) colours of my theme bring this across.

- Purple is a colour that emotes a feeling of royalty.
- Black is a colour of power and sophistication.
- Gold gives a feeling of success and once again power.

The target audience of this website is any person that wishes to know more about me or if they haven't already, be introduced to me. It is also important to me that the target audience be engaged and not just be bombarded by words, so visual aids are to be used on multiple web pages, so they aren't strictly text.

Features Used On The Website
